Warning - How to Save Your Work and Correctly Use Enfusion Prefabs

WARNING: In Enfusion, the *World Editor* is used to edit worlds but also to create or modify prefabs (which is what we're doing). To modify prefabs, open the *Resource Browser*, locate your prefab, double-click on it, and click on *Edit Prefab*. From this point, you can modify your vehicle prefab or anything else (press **Ctrl + S** to save).

You can also modify prefab parameters by placing them in a world sub-scene. To save your changes, click *Apply to Prefab* and select the prefab in the window that has just opened.

Revision #2
